Short Cycle Weld Studs

SCT - SHORT CYCLE THREADED WELD STUDS - TECHNICAL DETAILS

The CD Drawn ARC process and the ARC Short Cycle process are the best equipment options for welding of Short Cycle weld studs.

In some applications the Standard ARC Process can be used without the ceramic ferrule.

The small flange diameter allows for components to be easily mounted on welded studs.

For assistance contact your [Complete Stud Welding](#) representative.

Short Cycle Weld Studs

SCM – SHORT CYCLE GROUND STUD W/ CAP – TECHNICAL DETAILS

The ARC Short Cycle process is the best equipment option for welding Short Cycle Ground Studs.

The Standard ARC Process can be used without the ceramic ferrule. Gas shielding is recommended regardless of process used.

Studs are available with or without the caps installed. Studs are available in mild steel and 18-8 stainless steel. Mild steel studs are copper or nickel plated.

The Short Cycle Ground Stud is used as a ground stud in several automotive and industrial applications. The plastic cap protects the threads and washer face during paint operations. Once the cap is removed, the paint free washer face and threads provide an excellent connection point for ground terminals.
